

# RISK MANAGEMENT

MADE SIMPLE

LOG IN

The Consortium exists as a risk sharing pool formed by the Florida College District Boards of Trustees under a mutual agreement. Florida Statutes allow the creation of a Consortium by the college system to develop a cooperative system of risk management under one comprehensive, statewide plan.

## WHO WE ARE

At its primary level, the FCSRMC is a collection of participating member institutions of the Florida College System. In terms of day to day operations, the FCSRMC is administered by a staff of insurance and risk management professionals dedicated to delivering comprehensive and innovative enterprise-wide risk

## WHAT WE DO

FCSRMC staff administer programs to help our member institutions recognize, treat, and embrace risks and opportunities that arise as a natural part of the business of higher education.

management services and solutions to support the educational mission of the Florida College System.

## WHO WE SERVE

FCSRMC staff directly serves participating member institutions of the State College System and indirectly serves the faculty, staff, parents, and students of those member institutions, by advancing sound risk management practices and services to help fulfill the academic mission of our member colleges.

## BENEFITS

By joining together, the participating member institutions are able to reap the benefits of collective purchasing power to provide a stronger, more cost-effective risk management program than any one institution could procure on its own. In addition, the central administration of the FCSRMC allows for a cross-pollination of risk management programs and ideas that mutually benefits all members of the FCSRMC.

## ERM & YOU

Learn about Enterprise Risk Management principles and how the Consortium is working to foster a culture where Everyone is a Risk Manager.

At FCSRMC we believe “Everyone is a Risk Manager” ERM...Each one has the opportunity to impact Risk, either positively or negatively.

Risk management is an increasingly important business driver and stakeholders have become much more concerned about risk.

Risk may be:

- **A driver of strategic decisions**
- **The cause of uncertainty in an organization**
- **Embedded in the activities of the organization**

An enterprise-wide approach to risk management enables an organization to consider the potential impact of all types of risks on all processes, activities, stakeholders, products and services.
